SUMMARY REPORT
FT 981

FOR IMMEDIATE RELEASE
December 15, 1952

SHIPPING WEIGHT AND DOLLAR VALUE OF MERCHANDISE LADEN ON AND UNLADEN FROM VESSELS AT UNITED STATES PORTS DURING THE IN-TRANSIT MOVEMENT OF THE MERCHANDISE FROM ONE FOREIGN COUNTRY TO ANOTHER

COVERAGE

This report presents the value (millions of dollars) and shipping weight (millions of pounds) of in-transit merchandise moving into and/or out of United States ports by vessel. In-transit merchandise is defined as merchandise coming into the United States from a foreign country and shipped to a foreign country without having been entered as an import. Such merchandise remains in Customs custody or under bond at all times while in the United States to assure that none of it enters consumption channels without the payment of United States import duties. In-transit merchandise includes the following:

(1) Foreign merchandise transferred from one vessel to another in the United States port of arrival and shipped to a foreign country without being released from Customs custody in the United States.

(2) Foreign merchandise shipped through the United States under Customs bond, leaving the United States from a port other than that at which it arrived.

(3) Foreign merchandise withdrawn from a General Order Warehouse for immediate export or for transportation and export (such merchandise was not recorded as an import when it entered the warehouse).

(4) Foreign merchandise shipped from a United States Foreign Trade Zone to a foreign country (such merchandise is deposited in the Foreign Trade Zone without being entered as an import).

Foreign merchandise entering the United States from a Foreign Trade Zone for shipment to a foreign country is excluded from the inbound in-transit statistics but is included in the outbound in-transit statistics when it leaves the United States.

Shipments of merchandise on United States flag vessels moving from one United States port to another via a foreign port do not require the filing of export or import documents if none of the merchandise is unladen at the foreign port. This exemption also applies, in certain instances, to merchandise moving on foreign flag vessels trading in the Great Lakes area. Similarly, the filing of documents for merchandise moving by vessel from one foreign port to another foreign port via a United States port is not required if none of the merchandise is unladen in the United States. The shipments described above are not defined as in-transit merchandise and are not included in the inbound or outbound in-transit statistics; neither are they included in the export or import statistics compiled by this Bureau.

Foreign merchandise entered as an import into the United States and subsequently re-exported is not included in the inbound or outbound in-transit statistics. Such merchandise is reported as an import upon arrival, and upon shipment to a foreign country is classified as either an export or a re-export.

Shipments of in-transit merchandise are excluded from the statistics on exports and imports by vessel shown in Reports FT-972, FT-973, FT-976, SM-303, SM-703, etc., and from the total United States export and import statistics shown in Reports FT-900, FT-950, FT-410, FT-120, etc. (See Foreign Trade Statistics Notes for August 1947, February 1948 and June 1950.)

These data are preliminary and subject to revision.

The data in this report summarize a special tabulation prepared for the Board of Engineers for Rivers and Harbors, Corps of Engineers, Department of the Army.
